Objective and Investment Policy

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation. To achieve a combination of income and capital growth (total return). The Sub-Fund invests at least 50% of net assets in debt instruments that are: - issued or guaranteed by emerging country governments or government agencies, or - issued by companies that are headquartered, or do substantial business, in emerging countries. There are no currency or rating constraints on these investments. The Sub-Fund may invest up to 20% of net assets in ABSs and MBSs. The Sub-Fund may also invest in other types of bonds, money market instruments, deposits, up to 25% in convertible bonds; and up to 10% each in equities and equity-linked instruments, UCITS/UCIs, distressed securities or contingent convertible bonds. The Sub-Fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on credit, interest rates, foreign exchange, and volatility). The Sub-Fund may use credit derivatives (up to 40% of net assets). **Benchmark** : The Sub-Fund is actively managed by reference to and seeks to outperform the 50% JP MORGAN ELM PLUS + 50% JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE HEDGED. The Sub-Fund is mainly exposed to the issuers of the Benchmark, however, the management of the Sub-Fund is discretionary, and will be exposed to issuers not included in the Benchmark. The Sub-Fund monitors risk exposure in relation to the Benchmark however the extent of deviation from the Benchmark is expected to be material. The Sub-Fund has not designated the Benchmark as a reference benchmark for the purpose of the Disclosure Regulation. **Management Process** : The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The investment team analyses interest rate and economic trends (top-down) to identify the geographic areas that appear likely to offer the best risk-adjusted returns. The investment team then uses both technical and fundamental analysis, including credit analysis, to select issuers and securities (bottom-up) and to construct a highly diversified portfolio. Further, the Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of the investment universe.

ESG Terminology

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:
 "E" for Environment (energy and gas consumption levels, water and waste management, etc.).
 "S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).
 "G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

ESG Rating

The issuer's ESG rating: each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).

ESG rating of the investment universe and the portfolio: the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy⁴, Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

¹ The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.
² Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.
³ Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
