

**Objectives and Investment Policy (Source: Amundi) \***

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

To achieve long-term capital growth.

The Sub-Fund invests at least 51% of net assets in equities of companies that have a wide range of market capitalisation of at least USD 10 billion.

The Sub-Fund may invest up to 35% of net assets in equities of companies domiciled in emerging markets. There are no currency constraints on these investments.

The Sub-Fund may use derivatives for hedging.

**Benchmark :** The Sub-Fund is actively managed by reference to and seeks to outperform the MSCI World All Countries (ACWI) (Net dividend) Index. The Sub-Fund is mainly exposed to the issuers of the Benchmark, however, the management of the Sub-Fund is discretionary, and will be exposed to issuers not included in the Benchmark. The Sub-Fund monitors risk exposure in relation to the Benchmark however the extent of deviation from the Benchmark is expected to be material. Further, the Sub-Fund has designated the Benchmark as a reference benchmark for the purpose of the Disclosure Regulation. The Benchmark is a broad market index, which does not assess or include its constituents according to environment characteristics and therefore is not aligned with the environmental characteristics promoted by the Sub-Fund.

**Management Process :** The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus.

The investment team selects equities based on a disciplined approach to valuation (bottom-up), constructing a concentrated portfolio that consists of those securities about which the investment team has conviction. The Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of the Benchmark.

The accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.

The minimum recommended holding term is 5 years.

Shares may be sold or redeemed (and/or converted) on any dealing day (except otherwise stated in the prospectus) at the respective dealing price (net asset value) in accordance with the articles of incorporation. Further details are provided in the prospectus of the UCITS.

**Risk & Reward Profile (SRRI) (Source: Fund Admin)**

The SRRI represents the risk and return profile as presented in the Key Investor Information Document (KIID).

The risk level of this Sub-Fund mainly reflects the market risk arising from investments in international equity markets, including emerging markets equities.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

**Additional Risks**

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.
- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries. The occurrence of any of these risks may have an impact on the net asset value of your portfolio.

(1) Source: Amundi: All the performance data provided above is calculated based on the net asset value in the reference currency of the class (US dollar), dividends reinvested. Returns in euro may decrease or increase according to exchange rate fluctuations between the US dollar and the euro. During certain periods, net asset value and some earnings (converted into Euro) declined due to fluctuations in the EUR/USD exchange rate. The returns and changes in net asset value indicated relate to past years and are not a reliable indicator of future returns. Performance is shown excluding the fees and commissions borne by the investor. The value of the investments may rise or fall according to market trends. Annual returns cover a full period of 12 months for each calendar year. For comparison purposes, the NAV charts are prepared based on the assumption that the net asset value and the index value are equal to 100 at the starting date of the chart period.

(2) Returns are calculated net of the taxes applicable to the average retail client classed as a natural person residing in Belgium and the tax regime in question applies to this type of person.

(3) Cumulative return : for periods under 1 year, Since and annualised return : 3 years, 5 years
