Objective and Investment Policy

Seeks to increase the value of your investment over the recommended holding period, through investment in Sustainable Investments pursuant to Article 9 of the Disclosure Regulation. The Sub-Fund invests mainly in a broad range of equities of companies from anywhere in the world that offer products or technologies that promote a cleaner and healthier environment or are environmentally friendly. Examples include companies in the fields of air pollution control, alternative energy, recycling, water treatment and biotechnology. Whilst the investment manager aims to invest in ESG Rated securities not all investments of the Sub-Fund will have an ESG rating and in any event such investments will not be more than 10% of the Sub-Fund.

The Sub-Fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on equities and foreign exchange).

Benchmark : The Sub-Fund is actively managed. The Sub-Fund may use a benchmark a posteriori as an indicator for assessing the Sub-Fund's performance and, as regards the performance fee benchmark used by relevant share classes, for calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction. The Sub-Fund has not designated the Benchmark as a reference benchmark for the purpose of the Disclosure Regulation.

Management Process : The Sub-Fund's sustainable investment is focused primarily on investing in securities that contribute to an environmental objective. The investment process identifies the best opportunities both in terms of financial prospects as well as their ESG, in particular environmental, characteristics. The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The Sub-Fund allocates investment to securities having environment, social or governance characteristics diversified across ten ESG sectors/themes (sustainable mobility, agriculture/forestry, healthy living, IT-efficiency, water, clean technology, pollution prevention, alternative energy, energy efficiency, ESG commitment) with each investment falling into one of these sectors/themes. This diversification offers investors an exposure across a range E, S, and G characteristics.

Further, the Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of the Benchmark. When analysing ESG score against the Benchmark, the Sub-Fund is compared with the ESG score of its Benchmark after 20% of the lowest ESG rated securities have been excluded from the Benchmark.

Risk & Reward Profile (SRRI) (Source: Fund Admin)

Lower risk, potentially lower rewards

Higher risk, potentially higher rewards

The SRRI represents the risk and return profile as presented in the Key Investor Information Document (KIID). The lowest category does not imply that there is no risk. The SRRI is not guaranteed and may change over time.

The risk level of this Sub-Fund mainly reflects the market risk arising from investments in equities of the industry sector the Sub-Fund invests in.

Additional Risks

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.
- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries. The occurrence of any of these risks may have an impact on the net asset value of your portfolio.

ESG Terminology

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:

- “E” for Environment (energy and gas consumption levels, water and waste management, etc.).
- “S” for Social/Society (respect for human rights, health and safety in the workplace, etc.).
- “G” for Governance (independence of board of directors, respect for shareholders’ rights, etc.)

ESG Rating

The issuer’s ESG rating: each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).

ESG rating of the investment universe and the portfolio: the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers’ scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy⁴, Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

¹ The investment universe reference is defined by either the fund’s reference indicator or an index representative of the ESG-related investable universe.
² Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight).
³ Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
