Investment Objective

To seek provide a high level of current income over the recommended holding period.
 The Sub-Fund invests at least 80% of its assets in bonds, including mortgage-related and asset-backed securities. These investments may be from anywhere in the world, including emerging markets, and may be denominated in any currency. The Sub-Fund may invest up to 70% of its assets in below-investment grade bonds, up to 20% in bonds rated below CCC by Standard & Poor's or considered to be of comparable quality by the Management Company, up to 30% in convertible securities and, on an ancillary basis, equities.
 The Sub-Fund may hedge currency exposure back to either U.S. dollars or euro. The Sub-Fund may hold a position in any currency in connection with its investments, including as a means of managing currency exposure.
 The Sub-Fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on credit, interest rates and foreign exchange). The Sub-Fund may use derivatives to gain exposure to loans up to a maximum of 20% of its assets.
 The investment manager uses a combination of market analysis and analysis of individual bond issuers to identify those bonds that appear more creditworthy than their ratings indicate.

Risk & Reward Profile (SRII)

Lower risk, potentially lower rewards

Higher risk, potentially higher rewards

The SRII represents the risk and return profile as presented in the Key Investor Information Document (KIID). The lowest category does not imply that there is no risk. The SRII is not guaranteed and may change over time.

The risk level of this Sub-Fund mainly reflects the market risk arising from investments in international bonds.

Additional Risks

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.
- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Hedging risk : The currency hedging may be imperfect and generate a difference between the performance of the Sub-Fund and the share-class you are invested in.
