

FUND FACTS

Inception Date	4/15/1999
Total Net Assets (millions)	\$3,261.9
Gross Expense Ratio A	1.03%
Net Expense Ratio Y	0.69%
Gross Expense Ratio Y	0.71%
Total Holdings	1172

Total Net Assets and Number of Holdings represent all share classes.

The Net Expense Ratio reflects contractual expense limitations currently in effect through 2/1/2025 for Class Y Shares. There can be no assurance that Amundi US will extend the expense limitations beyond such time. Please see the prospectus and financial statements for more information.

Class	CUSIP	Nasdaq Symbol
A	723884102	PSRAX
C	723884300	PSRCX
K	723884706	STRKX
R	723884508	STIRX
Y	723884409	STRYX

FUND STRATEGY

The Fund seeks high current income by actively managing a diversified portfolio of U.S. and international high yield and investment-grade debt securities. It selects sector concentrations driven by evaluation of capital markets. The Fund actively adjusts a blend of fixed-income securities to manage risk, seek enhanced yield, and offer total return potential. *Diversification does not assure a profit or protect against loss.*

Call 1-800-225-6292 or visit amundi.com/usinvestors for the most recent month-end performance results. Current performance may be lower or higher than the performance data quoted. The performance data quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost.

Performance results reflect any applicable expense waivers in effect during the periods shown. Without such waivers, fund performance would be lower. Waivers may not be in effect for all funds. Certain fee waivers are contractual through a specified period. Otherwise, fee waivers can be rescinded at any time. See the prospectus and financial statements for more information.

PERFORMANCE HIGHLIGHTS Time Period: 12/31/13 through 12/31/23

Initial Investment: \$10,000 in Class A Shares at net asset value

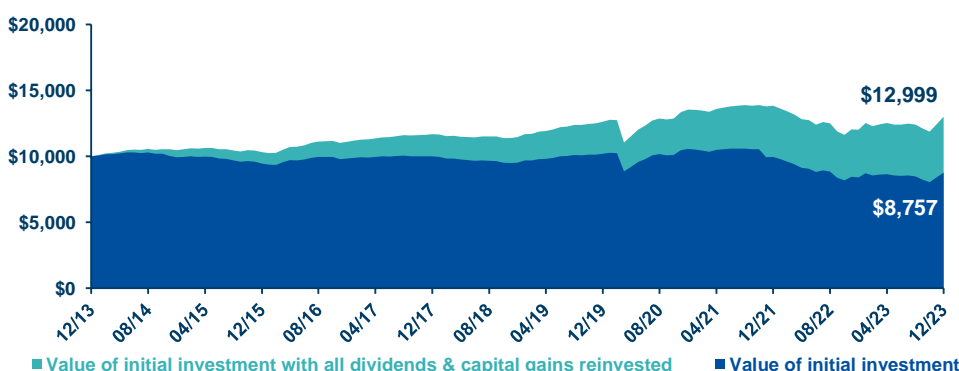

Chart is for illustrative purposes. These results represent the percentage change in net asset value per share. Returns would have been lower had sales charges been reflected.

AVERAGE ANNUAL TOTAL RETURNS (%) through December 31, 2023

	1-Year	3-Year	5-Year	10-Year	Since Inception
A Shares w/o sales charge	8.12	-1.36	2.57	2.66	5.42
Y Shares	8.52	-1.00	2.92	2.99	5.70
A Shares w/ sales charge	3.23	-2.87	1.64	2.19	5.22
Bloomberg US Universal Index	6.17	-2.97	1.44	2.08	4.15
Mstar Multisector Bond Cat. Avg.	8.13	0.10	2.93	2.83	4.35

Performance with sales charge reflects deduction of maximum 4.50% sales charge.

All returns are historical and assume the reinvestment of dividends and capital gains. Other share classes are available for which performance and expenses will differ.

Performance for periods prior to the inception of Class Y Shares on 9/9/04 reflects the NAV performance of the Fund's Class A Shares. The performance does not reflect differences in expenses, including the 12b-1 fees applicable to Class A Shares. Since fees for Class A Shares are generally higher than those of Class Y, the performance shown for the Class Y Shares prior to their inception would have been higher. Class Y shares are not subject to sales charges and are available for limited groups of investors, including institutional investors.

CALENDAR YEAR RETURNS (%) through December 31, 2023

	2023	2022	2021	2020	2019	2018
A Shares w/o sales charge	8.12	-13.11	2.15	7.39	10.18	-1.91
Y Shares	8.52	-12.82	2.56	7.65	10.55	-1.60
Bloomberg US Universal Index	6.17	-12.99	-1.10	7.58	9.29	-0.25
Mstar Multisector Bond Cat. Avg.	8.13	-9.93	2.29	4.82	9.68	-1.57

Performance without sales charge results represent the percent change in net asset value per share. Returns would have been lower had sales charges been reflected. The Bloomberg US Universal Index (benchmark) is the union of the US Aggregate Index, the US High Yield Corporate Index, the 144A Index, the Eurodollar Index, the Emerging Markets Index, the non-ERISA portion of the CMBS Index, and the CMBS High Yield Index. Municipal debt, private placements and non-dollar-denominated issues are excluded. The Morningstar Multisector Bond Category Average measures the performance of multisector bond funds within the Morningstar universe. Indices are unmanaged and their returns assume reinvestment of dividends and do not reflect any fees or expenses. You cannot invest directly in an index. Periods less than one year are actual, not annualized.

Brad Komenda, Portfolio Manager

Mr. Komenda, a Managing Director and Director of Investment Grade Corporates, joined Amundi US in 2008 and has been an investment professional since 1993.

A WORD ABOUT RISK

The market prices of securities may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, recessions, inflation, changes in interest or currency rates, lack of liquidity in the bond markets, the spread of infectious illness or other public health issues or adverse investor sentiment. Investments in high-yield or lower rated securities are subject to greater-than-average price volatility, illiquidity and possibility of default. The market price of securities may fluctuate when interest rates change. When interest rates rise, the prices of fixed income securities in the Fund will generally fall. Conversely, when interest rates fall, the prices of fixed income securities in the Fund will generally rise. Investments in the Fund are subject to possible loss due to the financial failure of issuers of underlying securities and their inability to meet their debt obligations. Prepayment risk is the chance that an issuer may exercise its right to prepay its security, if falling interest rates prompt the issuer to do so. Forced to reinvest the unanticipated proceeds at lower interest rates, the Fund would experience a decline in income and lose the opportunity for additional price appreciation. The securities issued by U.S. Government-sponsored entities (e.g., FNMA, Freddie Mac) are neither guaranteed nor issued by the U.S. Government. The portfolio may invest in mortgage-backed securities, which during times of fluctuating interest rates may increase or decrease more than other fixed-income securities. Mortgage-backed securities are also subject to prepayments. Investing in foreign and/or emerging markets securities involves risks relating to interest rates, currency exchange rates, economic, and political conditions.

Portfolio Characteristics

Weighted Average Life of Securities	7.89 Years
Weighted Average Maturity	7.79 Years
Effective Duration	6.64 Years

*The **Weighted Average Maturity** of certain funds might not be a useful measure if they contain securities with principal paydowns, such as mortgage passthroughs. Instead, market participants calculate **Weighted Average Life**, which reflects the average time to receipt of principal payments (scheduled principal payments and projected prepayments). **Effective Duration** (also called option-adjusted duration) is a duration calculation for bonds that have embedded options, which takes into account the fact that expected cash flows will fluctuate as interest rates change.*

Quality Distribution (%)

AAA	2.8
AA	30.3
A	6.2
BBB	22.3
BB	15.0
B	7.9
CCC	3.3
Not Rated	8.8
Cash Equivalent	3.3

Due to rounding, figures may not total 100%. Rating Description/Source: Credit rating breakdown reflects the average of available ratings across Moody's, Standard & Poor's (S&P), Fitch, DBRS Morningstar and KBRA. Bond ratings are ordered highest to lowest in the portfolio. Based on S&P's measures, AAA (highest possible rating) through BBB are considered investment grade. BB or lower ratings are considered non-investment grade. Cash equivalents and some bonds may not be rated.

Risk Measures (5-Year)

As compared to the Bloomberg US Universal Index

Beta	1.10
R-squared	54.72
Standard Deviation (Fund)	9.09
Standard Deviation (Benchmark)	6.14

*Source: Morningstar. Risk measures apply to Class A Shares only. **Beta** is a measure of the volatility of a fund relative to the overall market. **R-squared** represents the percentage of the portfolio's movements that can be explained by the general movements of the market. **Standard Deviation** is a statistical measure of the historic volatility of a portfolio.*
