Pioneer Global Sustainable Growth Fund

As of March 31, 2024

Y: SUGYX

A: SUGAX

C: SUGCX

amundi.com/us

The Fund seeks long term capital growth. The Fund seeks to hold a focused portfolio of quality growth stocks globally across any market capitalization. The Fund adheres to an ESG mandate and seeks to invest in securities of issuers with above-average potential for earnings and revenue growth, focusing on companies believed to have sustainable business models.

Morningstar Sustainability Ratings™, 1

Above Average as of 2/29/2024
(out of 359 funds in the Global Large Stock Growth Category)
Based on 100.00% of AUM.

Call 1-800-225-6292 or visit amundi.com/us/investors for the most recent month-end performance results. Current performance may be lower or higher than the performance data quoted. The performance data quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Performance results reflect any applicable expense waivers in effect during the periods shown. Without such waivers, fund performance would be lower. Waivers may not be in effect for all funds. Certain fee waivers are contractual through a specified period. Otherwise, fee waivers can be rescinded at any time. See the prospectus and financial statements for more information.

Top 10 Holdings⁷ (%)

	Sector	Portfolio	Benchmark
Amazon.com	Consumer Discretionary	6.2	4.5
Alphabet	Communication Services	5.2	4.5

Hilton Worldwide Holdings	Consumer Discretionary	2.9	0.1

¹Ratings are based on past performance, which is no guarantee of future results. See next page for Morningstar disclosures and additional information. ²Total Net Assets represent all share classes. ³The Net Expense Ratio reflects contractual expense limitations currently in effect through 2/1/2025 for Class A and Y Shares. There can be no assurance that Amundi US will extend the expense limitations beyond such time. Please see the prospectus and financial statements for more information. ⁴Definitions on following page. ⁵Performance without sales charge results represent the percent change in net asset value per share. Returns would have been lower had sales charges been reflected. ⁶Performance with sales charge reflects deduction of maximum 5.75% sales charge. All returns are historical and assume the reinvestment of dividends and capital gains. Other share classes are available for which performance and expenses will differ. Class Y shares are not subject to sales charges and are available for limited groups of investors, including institutional investors. Periods greater than one year are annualized. ⁷The portfolio is actively managed and current fund information is subject to change. The holdings listed should not be considered recommendations to buy or sell any security.

The MSCI AC World Growth Index (benchmark) measures the performance of developed and emerging market growth stock markets. The Morningstar Global Large Stock Growth Category Average measures the performance of global large stock growth funds within the Morningstar universe. Indices are unmanaged and their returns assume reinvestment of dividends and do not reflect any fees or expenses. You cannot invest directly in an index.

The MSCI information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. ⁸The portfolio is actively managed and current fund information is subject to change. The holdings listed should not be considered recommendations to buy or sell any security. ⁹Top country listings do not include cash. The countries listed display the country of issuance.

Morningstar Sustainability Rating™: The Fund's adviser may integrate ESG considerations in its investment research process, which may mean forgoing some investment opportunities available to funds that do not consider ESG information. Morningstar Sustainability Rating™ is a monthly measure of how well the holdings in a portfolio are managing their environmental, social, and governance, or ESG, risks and opportunities relative to their Morningstar Category peers. Globe icons depict the Morningstar Sustainability Rating as follows: 5 globes (High); 4 globes (Above Average); 3 globes (Average); 2 globes (Below Average) and 1 globe (Low). **Sustainalytics**, a leading provider of ESG research, provides company-level analysis used in the calculation of Morningstar's Sustainability Score. The Morningstar Sustainability Rating calculation is a two-step process. First, each fund with at least 50% of assets covered by a company-level ESG score from Sustainalytics receives a Morningstar® Portfolio Sustainability Score™. The Morningstar Portfolio Sustainability Score is an asset-weighted average of normalized company-level ESG scores with deductions made for controversial incidents by the issuing companies, such as environmental accidents, fraud, or discriminatory behavior. The Morningstar Sustainability Rating is then assigned to all scored funds within Morningstar Categories in which at least ten (10) funds receive a Portfolio Sustainability Score and is determined by each fund's rank within the following distribution: High (highest 10%); Above Average (next 22.5%); Average (next 35%); Below Average (next 22.5%) and Low (lowest 10%). A Sustainability Rating is assigned to any fund that has more than half of its underlying assets rated by Sustainalytics and is within a Morningstar Category with at least 10 scored funds; therefore, the rating it is not limited to funds with explicit sustainable or responsible investment mandates. The following copyright pertains only to Morningstar information. P/E refers to the price of a stock divided by its earnings per share. **Average P/E ratio (Trailing)** reflects weighted average of trailing 12-month price-to- earnings ratios of portfolio holdings. **Average P/E ratio (Estimated)** is the current price of a stock divided by the estimated one year projection of its earnings per share. **Market Capitalization** reflects the total U.S.-denominated portion of the portfolio. **Active Share** is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Turnover Ratio** is the percentage of a fund's assets that have changed over a given period, usually a year, based off of the Fund's fiscal year-end. Mutual funds with higher turnover ratios tend to have higher expenses.

A WORD ABOUT RISK: The market prices of securities may go up or down, sometimes rapidly or unpredictably, due to general market conditions, such as real or perceived adverse economic, political, or regulatory conditions, recessions, inflation, changes in interest or currency rates, lack of liquidity in the bond markets, the spread of infectious illness or other public health issues or adverse investor sentiment. Investing in foreign and/or emerging markets securities involves risks relating to interest rates, currency exchange rates, economic, and political conditions. The Fund is subject to currency risk, meaning that the Fund could experience losses based on changes in the exchange rate between non-U.S. currencies and the U.S. dollar. The Fund generally excludes corporate issuers that do not meet or exceed minimum ESG standards. Excluding specific issuers limits the universe of investments available to the Fund, which may mean forgoing some investment opportunities available to funds without similar ESG standards. The market price of securities may fluctuate when interest rates change. When interest rates rise, the prices of fixed income securities in the Fund will generally fall. Conversely, when interest rates fall, the prices of fixed income securities in the Fund will generally rise. The Fund may use derivatives, which may have a potentially large impact on Fund performance. The Fund may invest in IPOs (Initial Public Offerings), which may involve additional risks.
